Abstract (en)
[origin: WO2008061596A1] For fitting of a signalling and/or command device which is as quick and safe as possible and at the same time for safe protection against dust in particular for contact and/or luminous elements and wiring, a dust protection device (1) for a signalling and/or command device (2) is proposed in which at least one adapter element (20) for accommodating the signalling and/or command device (2) is provided and in which the signalling and/or command device (2) is in the form of a recessed device which can be installed flush in a wall, wherein the dust protection device comprises at least one dust protection housing (10), which accommodates at least part of the adapter element (20), wherein the adapter element (20) can be or is prefabricated with contact and/or luminous elements (4) and wiring for the signalling and/or command device (2) and at least that part of the adapter element (20) which contains the contact and/or luminous elements (4) and the wiring can be or is inserted into the dust protection housing (10).
