Abstract (en)

[origin: WO2008058807A1] In a plug arrangement of an electric motor-based auxiliary drive (12) for use in a vehicle, the auxiliary drive (12) has at least one plug element (18) for the connection of a mating part. Said plug element (18) is connected to an electrical functional element (20) of the auxiliary drive (12). It is recommended that the plug element (18) is arranged on a housing element (14, 16) of the auxiliary drive (12), which housing element is constructed to be rotatable and which can be assembled in the rotated position.
