Abstract (en)
[origin: WO2008064623A1] An assembly comprising electric and/or electronic components is cast into a housing (10) using a curing, electrically insulating casting material, and is characterized in that at least one connection extending at least slightly into the housing (10), accessible from the exterior of the housing (10), is provided on the housing (10), wherein the connection is electrically connected to the assembly and is cast together with the assembly from the inside.
