Abstract (en)

[origin: US2009211925A1] A contact lens storage and cleaning case is described. The case comprises (a) two contact lens chambers that are closed via a chamber cap for each contact lens; and (b) fluid reservoir and integrated pump. The contact lens chamber can be closed using removable chamber caps each of which has a flexible compressible cavity in whose center is mounted a flexible cap membrane that faces and isolates the chamber. Air can escape from the cavity via an opening in the chamber cap.
