Abstract (en)

[origin: EP2096045A1] The ring (6) has a peripheral annular upper rim (12) projecting towards the interior and comprising a lower surface fixed against a rim (10) of an upper container (4). A peripheral ferrule (16) has a lower part with retaining pins (14) fixed against a rim (8) of a lower container (2). A radial slit (20) is extended up to a rigidifying pin that concentrates rupture constraints of the ring, when traction is applied on a round tab (18) of a peripheral annular lower rim (28). The rim (28) is projected towards the exterior. A mouthpiece of one container is closed by a cover i.e. membrane seal.
