Abstract (en)

[origin: EP2096215A2] The device has a base consisting of a magnetic material for application to the wall (1), especially a rail (10), and a carriage (20) movable along the rail, whereby the carriage has a cantilever element (21) for accommodating the hand held outlet (24) and at least one magnet (25,26) at the end or extending along the carriage. An independent claim is also included for an arrangement of a rail for holding a hand-held shower outlet.
