Abstract (en)

[origin: EP2096237A2] The device has a handle (10), which is transferred in an effective position. The handle is applied for opening and closing a door (20). A connecting medium (50) is provided for connecting a cover (40) with the door indirectly or directly. The connecting medium is made up of a flexible material. The connecting medium is carried out in a single piece with the cover.
