Abstract (en)

[origin: EP2096359A1] To further develop inserting devices for a cooking compartment of a cooking appliance, the invention proposes a side frame for an inserting device of a cooking compartment, which comprises at least one guiding device comprising a support rod and a guide rod, which is radially spaced apart therefrom and which runs substantially parallel, wherein the guide rod encompasses a guide rod length, which is at least more than a third of a support rod length of the support rod and wherein the guiding device is characterized in that an insertion-side guide rod end at an insertion side of the guiding device lies axially behind an insertion-side support rod end.
