Abstract (en)
[origin: EP2096389A2] The device (10) has a separate tray (20) i.e. closed tray or pull-out tray, present in an interior (12) of the device. Multiple interior ventilators (30) are provided in the interior, where each ventilator is arranged such that the ventilator partly directs an air passage within the device through the tray and/or on the tray and/or at the tray. The ventilators are arranged on the tray for leading the cold air into the tray discharging from an evaporator (40) and into the interior. Closable openings are provided in the tray for adjusting the air humidity inside the tray.
