Abstract (en)
[origin: EP2096608A2] An adjustable tamper assembly comprises a tamper member (12) mounted on a support (13) which is connected releasably to a tamper mounting (14) provided on a component part of an alarm. The co-operating surfaces of the tamper support (13) and mounting (14) are curved in shape to allow the sensitivity of the assembly to be varied by variation of the relative position of the components to one another.
