Abstract (en)

[origin: WO2008079306A2] Disclosed herein is a packaging system to support a blister package in a substantially vertical orientation. Such a vertical orientation of a medication storage device is intended to raise the visual prominence of the medication storage device, and thus serve as a reminder to a patient to adhere to the prescribed dosing regimen relevant to that medication. Improved patient compliance is an intended goal. An example of a preferred embodiment is as follows.
