Abstract (en)
[origin: DE102006050646A1] A machine for preparing corrugated cardboard sections (2) laid onto a support surface (3) has an overhead transverse support (8) for a number of motor driven tools. These include a grooving tool (9), a cutter (15) and a perforating tool (10). The tools are mounted on vertical guides (11 to 14) to selectively contact the cardboard. A rack and pinion powers the transverse drive while the cardboard sections are moved along a transporter (3).
