Abstract (en)  
[origin: WO2008065240A1] The invention relates to a method in a reeler of a fibre web, in which method, the web (W) is reeled around a reeling shaft (21) into a web roll (22) by means of a reeling nip (RN) between a reeling drum (10) and the forming web roll (22). The structure of the web roll (22) is affected by a roll nip (N) provided between the forming web roll (22) and a separate roll (40) adjustable of its bow during reeling. The invention also relates to a device in the reeler of a fibre web, which reeler comprises a reeling drum (10) for providing a reeling nip (RN) with the forming web roll (22). The device comprises a separate roll (40) adjustable of its bow for providing a roll nip (N) with the forming web roll (22) for affecting the structure of the web roll (22).
