Abstract (en)

[origin: WO2008078008A1] The invention relates to a handling anchor, in particular for lifting, raising, turning over, transporting and laying building elements such as precast blocks or panels essentially made of concrete and to be connected to a building element (6), of the type including a connecting head (3) for connecting the building element to a handling machine and a body portion including active parts that, when the anchor (1) is connected to the construction element, ensure the adhesion thereof to the material of the building element. The anchor is characterised in that the portion defining the anchor body includes at least one land (2) including at least one face (14, 15, 16). The invention can be used for handling concrete panels.
