Abstract (en)
A display apparatus (1) comprises an object (2) for displaying one or more products and a light source (3) for illuminating at least a portion of a product display zone. The light source (3) is arranged at a distance from the object (2), and is adapted for directing at least a portion (4;4A,4B,4C) of its light towards the object (2). The display apparatus (1) is provided with one or more optical elements (6) for capturing a portion of the light and for redirecting and/or redistributing a portion of the captured light towards at least a portion of a product display zone behind the object (2).
