Abstract (en)

A method and machine for machining wood components (2) or the like, according to which each component (2) to be machined is fed to a feeding station (30, 33) by means of a movable carriage (41) having a plurality of resting planes (P3) for a plurality of components (2), is transferred from the relevant resting plane (P3) to a gripping and conveying assembly (15, 25) by means of a lifting device (37) movable between the resting planes (P3) themselves, and is released by the gripping and conveying assembly (15, 25) to a clamping device (23) to be machined by means of an operating head (12.).
