Abstract (en)
[origin: EP2098360A1] Provided is a device for forming a special giant all-steel radial OTR tire in a continuous process, the device comprising a first base guide rail (1), a second base guide rail (2), a headstock (3), a main building drum (4), a belt housing (7), a belt drum (8) and an overhead rail (10). The first base guide rail and the second base guide rail are parallel to each other. The overhead rail comprising a first traveling unit (14) and a second traveling unit are disposed above the first base guide rail and the second base guide rail. A method for forming a special giant all-steel radial OTR tire in a continuous process is also provided.
