Abstract (en)

[origin: EP2098368A2] The method involves drawing a print image on a printed substrate in a printing machine (01) with a printing plate. The information content of identification is provided by a control unit (16) of a production planning system for controlling a production of a printing machine. The identification is found at a selected position in the printing machine. The information content of the identification varies from the control unit of the production planning system.
