Abstract (en)

[origin: EP2098656A1] In a roofing system (1), at least one fretted slab-shaped element (5) resting on a resting and fixing structure (2) is connected to the structure (2) itself by means of at least one snapping retaining assembly (15), which is interposed between a side surface (8) internally delimiting a concave rib (7) of the slab-shaped element (5) and the resting and fixing structure (2), and comprises at least one connecting element (20;24) integrally made with the slab-shaped element (5).
