Abstract (en)
The invention relates to a mobile temporary shelter, comprising a collapsible frame defining a sitting and/or reclining part, and a canopy which is connected to the frame and which is movable between a fully folded-down rest position and a fully folded-out position in which the sitting and/or reclining part are substantially fully protected from the environment. According to a first aspect of the invention, the shelter is provided with means for fixing the canopy in at least one position lying between the fully folded-down and the fully folded-out position and partially protecting the sitting and/or reclining part. According to another aspect of the invention, the sitting and/or reclining part comprises a base which is supported by the frame and of which at least a part is movable between a substantially horizontal reclining position and at least one sitting position in which this base part encloses an angle to the horizontal.
