Abstract (en)

The arrangement (10) has two fitting parts (11, 15) pivotable relative to each other, where the fitting part (11) i.e. base plate, has a cam (12) with a constant radius, and the fitting part (15) i.e. connecting rod, has two guiding units (13, 14) i.e. bolts, arranged at a distance from each other. The guiding units project into the cam and serve as a rotary support for the pivoting movement of the fitting parts relative to each other, where the fitting parts are pivotable to each other around a virtual rotary point (16). An independent claim is also included for a window or door comprising a wing pivotable relative to a fixed frame around a vertical pivoting axis.

Abstract (de)

Bei einer Beschlaganordnung (10) für ein Fenster, eine Tür mit begrenztem Einbauraum für die Beschlaganordnung (10) mit zwei relativ zueinander schwenkbaren Beschlagteilen (11, 15) sind die Beschlagteile (11, 15) um einen virtuellen, außerhalb der Beschlaganordnung (10) liegenden Drehpunkt (16) zueinander schwenkbar. Dadurch reduziert sich der Einbauraum.
