Abstract (en)

[origin: EP2098800A2] The device has a carrier (1) fastened to a wall and comprising two fastening elements (2) in which a thermo-technical device is fastened by a hanging element that is aligned with respect to the fastening elements. The fastening elements are formed and arranged in corresponding distant positions at the carrier under consideration of different distances (A, B) of the hanging element with the thermo-technical device. The fastening elements are formed from a hook element that is designed in the form of a right-angled piece and fastened to the carrier in a desired position.
