Abstract (en)  
[origin: EP1941860A1] The present invention relates to formulations based on a w/o emulsion for topical application containing a one or more alpha hydroxy acids in an amount of 1-30 % of the formulation, a specific polar oil and a suitable emulsifier so that the composition has a reduced stinging potential and an improved feel. The formulations are intended for use as a cosmetic or pharmaceutical formulation. The invention also relates to the use of such w/o emulsions for preparing cosmetic and pharmaceutical formulations having reduced stinging potential and improved feel.
