Abstract (en)  
[origin: FR2909005A1] The insert has a pair of complementary shells (20, 22) respectively forming bulbs (40, 50), and made of rigid material i.e. polyamide, where the insert is made of thermoplastic material i.e. polyethylene. The bulbs have median bulges (R, R') with respect to a longitudinal axis of a handle. Transversal directions of each bulb are decreased continuously from the corresponding bulge in a direction of two axial ends of the bulb.
