Abstract (en)
[origin: US2010062871A1] Device for practicing a sequence of movement in the golf swing, includes a base, and a first support, that is mounted on the base in a manner such that it can pivot about a first vertical axis and is intended for a golf player to place a first foot onto the first support which has a first supporting part for supporting the front part of the foot and a second supporting part that can be pivoted about a horizontal axis and is intended for supporting the heel of the first foot, a guide device is provided which is arranged on the base in a manner such that it at least partially surrounds the first vertical axis and which exhibits a curved design which rises from a lowermost point and which supports the second supporting part, and a second support is provided for the golf player to place his second foot on.
