Abstract (en)  
[origin: WO2008083826A1] The invention relates to a door opener comprising a door opener housing and a bolt configured to engage with a bolt receiving compartment. The invention also relates to a closing system comprising a door lock at the door leaf side, said door lock having at least one bolt, and a door opener having a bolt receiving compartment into which the bolt projects when the closing system is closed. The invention also relates to a method for operating a closing system having a door opener and a door lock which comprises at least one bolt.
