Abstract (en)  
[origin: WO2008068203A1] The present invention relates to a vehicle, comprising an internal combustion engine (1) which is designed for combusting an ethanol-containing fuel, and an engine-independent air heating system (20), wherein an exhaust passage (23) of the engine-independent air heating system (20) is disposed adjacent to a suction pipe (2) of the internal combustion engine (1) in order to heat the air in the suction pipe (2), and/or wherein the exhaust passage (23) of the engine-independent air heating system (20) is disposed adjacent to a fuel supply line (7) of the internal combustion engine in order to heat fuel in the fuel supply line (7), and/or wherein a connecting element (24) is disposed between the exhaust passage (23) of the engine-independent air heating system (20) and the suction pipe (2) in order to pass the exhaust gas of the engine-independent air heating system (20) completely or partly into the suction pipe (2).
