Abstract (en)

[origin: WO2008061263A2] A differential gear for a wind power plant, comprises a gearbox (7) with three inputs and outputs, wherein one input is connected to the rotor (3) of the wind power plant, the first output is connected to a generator (11) and the second output is connected to the input shaft of a continuously variable gearbox (12), the output shaft of which is connected to the generator side output of the gearbox (7). The input shaft of the continuously variable gearbox (12) is connected to the output shaft of the gearbox (7) by means of a variable gearbox (15).
