Abstract (en)
[origin: EP2100644A1] The flipper (1) has a support part (3) integrating a web (4) and a foot-receiving part receiving area (5). A foot-receiving part (2) has a lower foot-receiving part (6) at a reception area of the support part and an upper foot-receiving part (7) independent from the lower foot-receiving part. An adjustable connection unit (8) ensures a connection of the upper foot-receiving part and the support part according to two longitudinal adjustment positions allowing locking of the parts (6, 7) around a foot of a user according to a size of the foot.
