Abstract (en)  
[origin: EP2100701A1] The material machining machine has a machine base frame (10), at which a cutting tool is arranged. A buzz saw blade (20) is supported by a bearing unit in a rotating manner. A transverse table is provided with a horizontally lying workpiece support surface. A telescope pivot arm (60) supports the transverse table and is connected with the machine base frame at an inner end (61a) of telescope pivot arm. An outer end (62b) of the telescope pivot arm is fixed at the transverse table in a linear manner. An independent claim is included for a telescope pivot arm arrangement for a material machining machine.
