Abstract (en)

[origin: EP2100705A1] The processing device has a portal (20) including two portal bridges (3) that are movably fixed to the portal. Processing units (5) i.e. to-be-processed element setting units, are movably fixed to the bridges. A supplying device (4) supplies to-be-processed elements e.g. fittings, to the processing units. Two feeders (1, 2) i.e. belt conveyors, feed and hold a workpiece (10). The bridges transversely extend via the feeders, and are transversely and vertically movable in a direction of longitudinal extension of the feeders.
