Abstract (en)
[origin: EP2101016A2] The device has a number of stripping panels (31) connected with each other to a ring, where two of the stripping panels are attached and provided adjacent to each other. A cutter is coupled with the two stripping panels to pretension edges of the two stripping panels. The cutter has two blades that are flexibly connected with each other. A drive is provided to change the distance of free ends of the blades from each other. The blades are mounted at a base of the cutter, where the drive is arranged and/or supported at the base. Independent claims are also included for the following: (1) an external formwork of a round tank formwork for use with a stripping device (2) a conductor cage for with a stripping device.
