Abstract (en)
The connector (1) has uprisings i.e. rising sloping surfaces, provided at its lower side and arranged at different distances from each other in an edge area of the connector. The uprisings are provided on a surface arranged opposite to a base (2) that has a through hole. An uppermost level of the uprisings is closed with the base or projects above the base. Center stoppers provide an insertion length in a spacer-hollow profile that is made of metal and plastic. The stoppers are arranged at outer sides of longitudinal side bars (3, 4). A compensating element (7) is attached to the stoppers.

Abstract (de)
Steckverbinder aus Kunststoff zum Verbinden von Hohlprofilen, insbesondere von Abstandhalter-Hohlprofilen aus Metall, Kunststoff od. dgl. für insbesondere Mehrscheibenisoliertgläser, wobei der Steckverbinder an seinen Seiten mit nach außen gerichteten Lamellen versehen ist, wobei auf der Unterseite des Steckverbinders eine Vielzahl von Erhebungen vorgesehen ist, die in unterschiedlichen Abständen voneinander ausschließlich im Randbereich des Steckverbinders angeordnet sind.
