Abstract (en)

[origin: CA2674792A1] A ball kicking practice device having target indicia located in at least one position on the exterior of the ball. Feedback indicia circumferentially located on the ball extending through the target changes in appearance in form or color subsequent to a proper strike of the ball with the foot. Shoe contact indicia provides contact points on a shoe for practicing contact with the targets on the exterior of the ball and to allow the user to practice keeping their eyes trained on the ball through contact by the user's foot and thereafter received feedback of a proper or improper strike from the change in appearance of the feedback indicia.
