Abstract (en)  
[origin: WO2008079932A2] An abrasive article includes a backing having first and second major surfaces, an abrasive layer overlying the first major surface, and a backsize layer overlying the second major surface. The backsize layer is formed from a formulation including a cationically polymerizable component, a radically polymerizable component, and at least 5% by weight of a nano-sized filler based on the weight of the formulation.
