Abstract (en)
[origin: WO2008071489A1] The invention relates to a percussive mechanism (2) of an electric hand-held machine tool (1), in particular a percussive hammer, comprising an electric motor (4), a transmission (5) and an eccentric arrangement (6) for producing the percussion, wherein the transmission (5) has a first transmission stage (7), which is coupled with the electric motor (4), and the first transmission stage (7) is adjoined by a second transmission stage (8), which is coupled with the eccentric arrangement (6), wherein the second transmission stage (8) has a transmission gearwheel (16), which is formed as an eccentric gearwheel.
