Abstract (en)

[origin: WO2008071484A1] The invention relates to an electric device, and in particular to an electric hand-held machine tool (2), comprising a housing (4), a rotatable operating element (8) arranged outside the housing (4) and a functional element (12), arranged inside the housing (4) and connected to the operating element (8) in a rotationally fixed manner. It is provided that the operating element (8) and the functional element (12) are locked together through an opening (14) in the housing (4).
