Abstract (en)
[origin: WO2008071584A1] The invention relates to a detergent and cleaning agent portion, comprising a) a first metering unit with a completely closed, water- soluble container of a transparent or translucent polymeric material and a first detergent or cleaning agent preparation which is enclosed in the container, which is liquid, and which occupies up to 99% by volume of the container capacity, the container furthermore containing a gas which is under a pressure of at least 1.02 bar and which occupies at least 1% by volume of the container capacity; and b) a second water- soluble metering unit which is different from the first and which contains a second detergent or cleaning agent preparation.
