Abstract (en)
[origin: WO2008074500A1] A flat gasket (1) for a valve consists of a substantially plate-like basic body (2) which corresponds substantially to the contour (9) of a valve housing (11) which is to be connected thereto and which is provided with at least one first passage borehole (3) through which a connecting element of the valve (11) can be passed, with at least one second passage borehole (6), and with at least one third passage borehole (5) through which fastening means can be passed. The second passage borehole (6) has a diameter which is different from the diameter of the third passage borehole (5).
