Abstract (en)  
[origin: WO2008084928A2] The present invention provides a refrigerator having an appearance giving an excellent aesthetic feeling to a user. A refrigerator includes a refrigerator storage chamber, and a door for opening and closing the refrigerator storage chamber, and the door includes a steel sheet constituting a door main body, a door glass positioned in front of the steel sheet, and a crystal positioned between the steel sheet and the door glass. In addition, a refrigerator having a storage chamber for storing food, and a door for opening and closing the storage chamber includes a steel sheet forming a basic structure of the door, a door glass formed in front of the steel sheet, a guide plate positioned between the door glass and the steel sheet, and attached to a rear surface of the door glass, and a crystal inserted into the guide plate.
