Abstract (en)

The invention relates to a modified handle of a tennis racket, characterised in that, at the base it is equipped with an ergonomic stabilizer of a grip composed of two separate elements, preferably ball-shaped, anchored separately directly in the base of the racket or in two channels of the frame running in the handle of the racket. In other variants of embodiment of the invention, the modified handle is equipped additionally with stabilizers located in centre or in centre and front zone of walls of the racket handle. The invention relates also to a method of modification a regular racket and a set of elements used for the adaptation.
