Abstract (en)

Enclosure, procedure for manufacturing an enclosure and machine for manufacturing an enclosure for door leaves, windows and wall coatings, the enclosure being a Majorcan style enclosure, constituted by one or more metallic panels (1) featuring alternate longitudinal grooves (2), each one of which comprises a first wall (3), a second wall (4) and a bottom (5) joining the first and second walls (3-4) being parallel to the panel plane, said bottom (5) forming an acute angle \pm with the first wall (3) and an obtuse angle \nless with the second wall (4). In the second roller (11-11'-11"... 11 m) stations (10-10'-10"... 10 n), the angle $^{\circ}$ formed between the axes (14-14'-14"... 14 m) of revolution of each one of the rollers (11-11'-11"... 11 m) and the spin axis (15-15'-15"... 15 n) of each one of the second stations (10-10'-10"... 10 n) equals $90^{\circ} - \pm$.
