Abstract (en)

A body (1) for electric plug or socket comprises a gripping member (2); a modular device-holding member (3); and rotative coupling means (5, 6, 7, 8); as well as a locking device (9) with an engaging portion (10) connected to one of the gripping (2) and modular device-holding (3) elements; a locking member (11) connected to the other of the gripping (2) and modular device-holding (3) elements, and which can be moved between a locking position and a release position. The locking device (9) comprises detent means (18) which, upon a rotative coupling in the closing position, prevent a return of the locking member (11) from the release position to the locking position.
