Abstract (en)
[origin: DE102006061625A1] The tool (2) has an electric drive motor connectable with a working spindle and/or a sliding tool over a transmission. A middle axle of a shaft of the transmission or a central axle of the drive shaft of the drive motor forms a pivoting axis (8), where the drive motor is pivotable around the pivoting axis. A housing (12) has a drive housing part (11) and a sliding tool housing part (4), where the drive housing part accommodates the drive motor, and the sliding tool housing part accommodates the working spindle and the sliding tool.
