Abstract (en)
[origin: WO2008077620A1] The invention relates to a multi-functional fitting (1) that has an outlet armature (2) for one or more fluids (I, II, III), the condition of which can be modified, an operating unit (36) comprising several distributed sensors (13, 14, 15, 16, 17) and/or switches (40, 42) for operating the multi-functional fitting (1) and a display (11). The display (11) has at least one display element (18), which is spatially and optionally functionally assigned to an associated sensor (13, 14, 15, 16, 17) and/or switch (40, 42). This permits the position, active area and optionally the function of the sensor or switch to be indicated to the user.
