Abstract (en)

[origin: EP2105056A1] The lymphatic drainage device comprises a lifting section (10) which forms a receiving space (18) for a breast (14) by a lower supporting section (15) and upper connecting sections (16,17). The lifting section is attached to two carrier straps (12,13) and an under breast strap (11) which is provided beneath the breasts and covers the thorax in the back area. The carrier straps are guided over each shoulder, where the lifting section is connected to the under breast strap in a taut manner to lift the breast for draining the lymph which is located in the breast.
