Abstract (en)
[origin: EP2105262A1] The magazine container (1) has a receiving body (5) and a tool receiver (27), which is formed in a central arranged core section (8) of the receiving body. A large front space (38) is provided in upstream direction in a cross section for the periphery of the core section of an external opening. One of the external openings is positioned opposite to rotation of a cover (12).
