Abstract (en)  
A sheet modular roofing (1) for a roof, including a plurality of sheets (2) adapted to be reciprocally constrained two by two by means of the overlapping and reciprocal engagement of respective edges (6, 7), and a plurality of anchoring brackets (3) including a stationary part (40) and a movable part (41) which are constrained to each other; the movable part (41) is movable between a first position in which it allows the insertion of a hooking portion (27) of an edge (7) of a first sheet (2) into the bracket (3), and a second position in which such a hooking portion (27) is rigidly locked in the bracket (3); an edge (6) of a second sheet (2) adjacent to the first sheet (2) is engageable on the edge (7) of the first sheet (2) and on the brackets (3).
