Abstract (en)

[origin: EP2105570A2] The external paneling has attachment profiles (4,5) with a chamber system having multiple chambers (6,7) provided as external paneling elements. The individual chambers are oriented on each another perpendicular to the level of external paneling between the attachment profile and a window frame (1) or a door. The attachment profile forms the external paneling view in the finished condition of the external paneling.
