Abstract (en)

[origin: EP2105661A2] The device has a duct e.g. air permeable cut-out, for air supply from interior. The cut-out includes lower and side openings relative to hollow body, and is provided with closed or air permeable cover at an upper end. The device is loosely fixed or placed on a bottom plate, which is connected with a rod holder by threaded screws or nuts and joints or locks. Spaced ribs are provided on a lower side of the bottom plate. A ventilating body is designed in conical or pyramid shape.
